OVERVIEW

Information Technology undergraduate (Year 3) at SLIIT with demonstrated expertise in full-stack web development using the MERN stack. Proven ability to build AI-powered applications, automation tools, and modern web solutions through academic projects and hackathons. Passionate about creating scalable, user-centric software that solves real-world problems. Strong foundation in software engineering principles, database management, and cloud technologies (AWS).

EDUCATION & EXPERIENCE

2024 - present

● SLIIT - Sri Lanka Institute of Information Technology

BSc (Hons) in Information Technology | 2024 - 2028

- specializing in Information Technology.
- Gained practical experience in full-stack development, databases, and software design.
- Completed academic projects including Full-Stack Development, Database Systems, Software Engineering, Cloud Computing, Data Structures & Algorithms

● ACADEMIC PROJECTS

Year 1 - 2 Academic Projects

SLIIT

- **Ticket Verse System** — A Java-based ticket management system developed as a university OOP project. The system applies core Object-Oriented Programming concepts to manage ticket booking and related operations, providing practical experience in Java application development and software design. [GitHub Repository](#)
- **Movie Reservation & Feedback Management System** — A web-based system designed to manage movie reservations and customer feedback, providing a streamlined platform for booking management and collecting user feedback. Developed as a university project with a focus on practical software development and database management. [GitHub Repository](#)

TECHNICAL SKILLS

- Frontend - React.js, Next.js, HTML5, CSS3, JavaScript
- Backend - Node.js, Express.js, RESTful APIs
- Databases - MongoDB, PostgreSQL, AWS Aurora, PostgreSQL
- DevOps & Cloud - AWS, Git, GitHub, Vercel
- Tools & Others - JWT Authentication, [Socket.IO](#), Web Scraping, Docker
- Soft Skills - Team Collaboration, Agile Development, Problem Solving, Rapid Prototyping

LANGUAGE

- English - Working Proficiency
- Tamil - Native

PROJECTS

Real-Time Chat Application

DEMO

- A full-stack real-time chat application designed for instant messaging, featuring separate frontend and backend components. Demonstrates experience in client-server communication, real-time application development, and full-stack architecture.

Tech: React.js, Node.js, Express.js, Socket.IO

[GitHub Repository](#)

Task Management System

DEMO

- Built a full-stack task management application supporting task creation, updating, deletion, and organization through a responsive web interface.

Tech: MERN Stack (MongoDB, Express.js, React.js, Node.js)

[GitHub Repository](#)

Java Projects Collection

DEMO

- A collection of Java-based projects developed to strengthen programming fundamentals, Object-Oriented Programming (OOP), data structures, and problem-solving skills through practical implementations.

Tech: Java, OOP, Collections, Exception Handling
